By exercising the Licensed Rights (defined below), You accept and agree to be bound by the terms and conditions of this Creative Commons Attribution-Noncommercial 4.0 International Public License ("Public License"). To the extent this Public License may be interpreted as a contract, You are granted the Licensed Rights in consideration of Your acceptance of these terms and conditions, and the Licensor grants You such rights in consideration of benefits the Licensor receives from making the Licensed Material available under these terms and conditions.

Section 1 – Definitions.

- **Noncommercial** means not primarily intended for or directed towards commercial advantage or monetary compensation.
- **Licensed Rights** means the rights granted to You subject to the terms and conditions of this Public License, which are limited to all Copyright and Similar Rights that apply to Your use of the Licensed Material.

Section 2 – Scope.

Subject to the terms and conditions of this Public License, the Licensor hereby grants You a worldwide, royalty-free, non-sublicensable, non-exclusive, irrevocable license to exercise the Licensed Rights in the Licensed Material to:

1. Reproduce and Share the Licensed Material, in whole or in part, for Noncommercial purposes only; and
2. Produce, reproduce, and Share Adapted Material for Noncommercial purposes only.

Section 3 – Attribution.

If You Share the Licensed Material, You must retain identification of the creator(s) and provide a URI or hyperlink to the Licensed Material to the extent reasonably practicable.

This game is an independent, modern reimagining of the 1981 board game Attack of the Mutants! originally published by Yaquinto Publications. The rules, gameplay mechanics, and universe presented here are a transformative derivative work inspired by the original design by Neil Zimmerer and Nolan Bond. All rights to the original 1981 work remain with their respective creators.

Overview & Narrative Background

Two hours ago, the Middle State Technical University (MSTU) campus was plunged into madness. Professor Julian Manbender—convinced of his own supreme intellect and determined to forge a compliant, elevated society—detonated a mutagenic weapon at his free "Green Energy" rock concert. Rather than clean energy, the device unleashed a biochemical agent that transformed the student body into a ravenous, snack-seeking mutant horde under his electro-telepathic sway.

A first assault on the Science Building was narrowly repelled. Now, a larger and hungrier horde surrounds the faculty and students inside. The defenders must buy time to activate the experimental **Ad Astra** time rift and confront Manbender before the mutation cascade becomes permanent.

Game Components

To play the miniatures edition, you will need:

- **The Game Map:** Representing the Science Building interior, research labs, corridors, and exterior perimeter staging areas.
- **Miniatures:**
    - **Humans:** 3 Professors (Applewhite, Richardson, Mincey), 3 Teaching Assistants (Penny, Buck, Percy).
    - **Robots:** Semi-autonomous GunBots™ and GripBots™.
    - **Mutants:** Professor Julian Manbender, 5 Mutant Security Officers, 40 Red "Extra Glowing" Mutants, and 56 Green Standard Mutants.
- **Markers & Tokens:** 12 Barricades, smashed door counters, and combat location markers.
- **Cards & Dice:** The Event Card Deck, Technology Advancement Deck, and a handful of standard six-sided dice (D6), one per person.
- **Tactical Combat Pad:** A staging pad dividing front line, reserves, and wounded casualties.

Victory Conditions

Mutant Victory

- The mutants win immediately if they establish sole control of the **Tech Room** at the center of the map, with no living humans or functional robots present, destroying the mechanism.

Human Victory

- The humans win by holding the **Ad Astra Lab** at the end of **Turn 10** (or at the end of **Turn 9** if Professor Mincey has occupied the lab continuously from Turn 6 through Turn 9).
- Holding the lab triggers the **Time Rift Assault**: all surviving humans and robots in the Ad Astra lab travel back to Dr. Julian Manbender's lab for a final showdown against Manbender and his 5 Mutant Campus Police. If Dr. Manbender is killed in this final battle, the time loop is broken and humanity is saved!

Initial Setup

Map Layout

Place the Science Building map in the center of the table. Keep smashed door counters, casualty markers, and the 12 barricades nearby. All mutants start outside the perimeter, while all humans and robots begin inside.

Human Setup

1. Professor Placement & Initial Confinement

The Human player must place the three professors in three different labs selected from the four research facilities:

- **Quantum Engineering Lab**
- **Robotics Lab**
- **Ad Astra Lab**
- **High Performance Computing Center**

Professor Lockdown Rule:

- All three professors must remain in their starting labs for the first three game turns (Turns 1–3).
- At the start of Turn 4, professors may move normally.
- **Tech Upgrade Roll:** At the start of Turn 4, roll 1D6 for each lab occupied by a professor. On a roll of **5 or 6**, that facility produces a breakthrough tech upgrade for the human defenders.

2. Teaching Assistants (TAs)

- Penny Applewhite, Leon "Buck" Bukaw, and Percy Fitzwater may be placed in **any room or corridor** inside the building.

3. Robots

- Robots (GripBots and GunBots) must start in an area occupied by at least one human, with one exception:
  - **GunBots™** may be deployed alone in hallways to set up passage choke points using their *Wall of Lead* ability.

4. Barricade Placement

The human player places 12 physical barricades across doorways or hallway corridors subject to the following structural restrictions:

- **Adjacency Limit:** Following the wall line from any barricade, it can only be adjacent to **at most one** other barricade. The very next opening along that wall circuit must be an unbarricaded door.
- **Hallway Barricades:** A barricade built across a corridor counts simultaneously as both a wall and a barricade.
- **Impassable to Humans:** Humans cannot move through barricades and cannot smash them down.

Mutant Setup

Exterior Staging Areas

- Mutants set up in the designated exterior staging areas surrounding the facility.
- **Capacity:** Each staging zone accommodates up to **2 mutants**.
- **Reserve Waves:** Mutants that do not fit in the starting staging areas remain in the exterior reserve pool and enter during subsequent turns.
- The Mutant player may select any combination of available mutant types to fill the staging positions.

Sequence of Play

Each game round follows five distinct phases in strict order:

[Phase 1: Event & Initiative] ⟶ [Phase 2: Mutant Horde] ⟶ [Phase 3: Human Action] ⟶ [Phase 4: Combat Resolution] ⟶ [Phase 5: Victory Check]

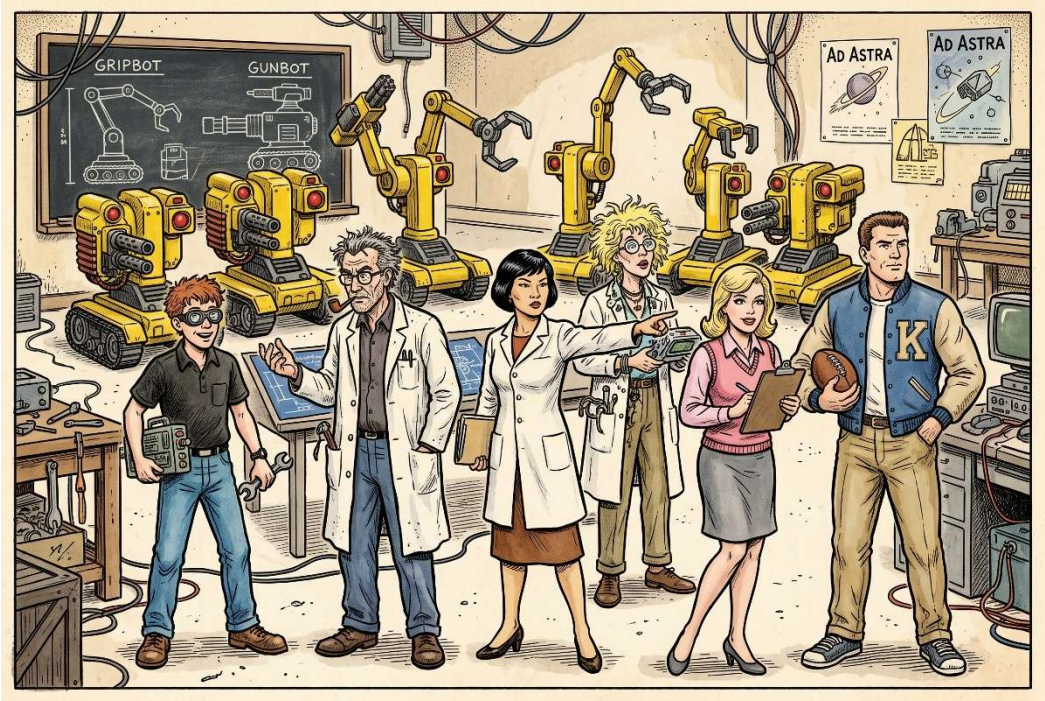

Phase 1: Event & Initiative

1. **Reinforcements:** The Mutant player places additional mutants into vacant exterior staging areas.
2. **Turn Event Card:** Draw the top card from the Event Deck.
    - The rule change or tactical effect applies **only for the current turn**.
    - A card only activates if the character named on the card is currently in play; if they have been eliminated, the card has no effect.
3. **Penny's Affection:** TA Penny Applewhite declares her favorite between Buck and Percy for the turn:
    - **Buck Chosen:** Buck gains **+1 Combat Value (CV)** this turn.
    - **Percy Chosen:** Percy gains **+1 Robot Repair** this turn.

Phase 2: Mutant Turn

1. **Smash! Tests:** Mutants attempt to break down closed doors or human barricades using the Smash! Matrix.
    - *Dual-Sided Exception:* If mutants occupy spaces on **both sides** of a door, the automated sensors malfunction and the door opens without a roll.
    - The door is not considered smashed and resumes normal function.
2. **Horde Movement:** Mutants move 1 area inside the science building or shift between adjacent exterior staging zones.All mutants in one area can move together, or you can split them up and some can go in other areas.
3. **Mark Contested Areas:** Mark every room or hallway containing both mutants and humans/bots for combat resolution.

Phase 3: Human Movement & Repair

1. **Standard Movement:** Humans move 1 area. Automatic internal doors open freely for humans and do not impede movement. Humans **cannot** pass through or smash barricades.
2. **Buck's Blitz:** Any squad or individual moving with Leon "Buck" Bukaw may move up to **2 areas**, provided the first area entered is clear of mutants. Buck may lead any humans or robots that began the turn in his starting area or that he picks up along the first step.
3. **Field Repairs:** Humans and GripBots eligible to repair robots roll against their repair target numbers on damaged friendly bots in their room. If successful the robot is brought back to full functionality.
4. **Mark Contested Areas:** Mark every room or hallways containing both mutants and humans/bots for combat resolution.

Phase 4: Tactical Combat Resolution

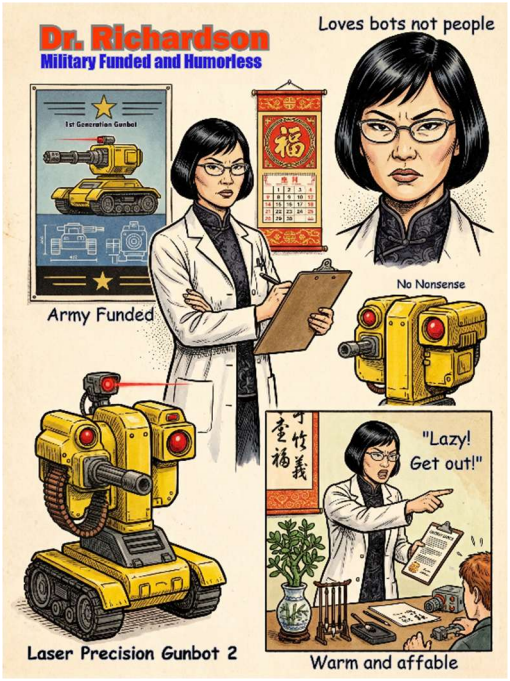

1. **Combat Order:** The Mutant player chooses the order in which contested areas are resolved.
2. **Engagement Limit:** Combats last a maximum of **two rounds**.
3. **Combat Pad Setup:** Place up to 3 combatants per side on the active line of the Combat Pad; remaining figures wait in reserve.
4. **Resolution & Casualties:**
    - Attackers roll 1D6 + CV; Defenders roll 1D6 + CV.

- Defeated mutants are removed from play. Defeated humans are shifted to the *Wounded* box.
- Glowing (Red) mutants make a Glow-and-Go check. Roll a die for each Glowing mutant. On a 1 the mutant explodes, a free door smash roll can be made and the mutant is removed from play.

5. **Retreat & Wounded Recovery:**
   - After each round, unwounded humans or GripBots in reserve or adjacent rooms may drag wounded allies into an adjacent mutant-free area.
   - If an area is forced to retreat and cannot hold all retreating figures, excess units are lost.
   - Reserve elements can move up to vacant spots on the battle line.
6. **Pressing the Advantage:**
   - Takes place at the end of the 2nd round of combat, or the end of the first round if all opponents are eliminated.
   - If one battle line is cleared, the other side is victorious in this battle.
   - **Victorious Humans:** May choose to press forward into an adjacent area.
   - **Victorious Mutants:** Receive an immediate free Smash! action against an adjoining door or barricade.
7. **No Victory**
   - Mutants and remaining humans may remain locked in battle, or
   - Humans may retreat to an adjacent area free of mutants.

Phase 5: Victory Condition Check

- Check whether mutants occupy the Tech Room without living humans or functional robots, or whether Turn 10 (or 9) has concluded with humans opening the time rift. Advance the turn counter.

Door Smashing & Tactical Combat

Part 1: Smashing Doors & Barricades

Standard automated science building doors open freely for humans and lock against mutants. To push inward, mutants must breach doors or human barricades during Phase 2 (or immediately after winning a combat).

The Software Glitch Exception

If mutants occupy areas on **both sides** of a door simultaneously, a logic fault in the sensor system causes the door to unlock and open freely. Mutants may pass through without testing.

Glow-and-Go Detonation Bonus

If a Glowing (Red) Mutant rolled a 1 during the Glow-and-Go check, it explodes and is removed. This generates a **free door smash check**.

The Smash! Matrix

Breaching requires testing with 1D6 based on the number of mutants assaulting the barrier (mutant mobs can be divided to work on different doors from the same room):

Number of Mutants	Roll Needed: Door	Roll Needed: Barricade
1	6	*Not Possible*
2	5+	6
3	4+	5+
4+	2+	4+

- **Success:** Remove the door or barricade counter. The pathway is permanently open.
- **Failure:** The barrier holds; mutants cannot move through it this phase.
- **Barricade Note:** Barricades are physical blockades constructed by humans. Humans **cannot** pass through barricades and **cannot** smash them down.

Part 2: Tactical Combat Resolution

When Mutants and Humans occupy the same room or corridor, combat occurs. Each engagement is resolved across a maximum of **two rounds**.

1. THE TACTICAL COMBAT PAD SETUP

The Combat Pad prevents crowded miniature scrums on the board and structures active lines:

- **The Battle Line:** A maximum of **3 combatants per side** may fight on the active front line per round. There must always be at least 1 figure on each side's front line.
- **Reserves:** Any additional units in the contested area remain off the line in their respective **Reserve Box**.
- **Outnumbering Bonus:** If one side has more units on the active front line than the other (e.g., 3 vs. 1, or 2 vs. 1—not counting reserves), that side gains **+1 Combat Value (CV)** to its rolls.

- *GunBot Exception:* If a **GunBot™** is on the human front line, the mutants **never** receive the outnumbering bonus.

2. PAIRINGS & COMBAT ROLLS

1. **Pairing Off:** The Mutant player chooses which mutant pairs up against which human/bot defender on the line.
2. **Combat Value (CV) & Dice:**
   - Values are written as either flat numbers (e.g., CV: 4) or multi-dice codes (e.g., CV: 3x2).
   - An entry of 3x2 means the character rolls **two D6**, takes the single highest die, and adds their base CV.
3. **Roll & Compare:**

$$\text{Total} = \text{D6 Roll} + \text{Base CV} + \text{Modifiers}$$

   - Both combatants roll simultaneously.
   - **Highest Score Wins:** The loser is eliminated (if a mutant) or placed into the **Wounded Box** (if a human or robot).
   - **Ties:** Attackers win ties (unless otherwise modified by pre-combat conditions).

3. SPECIAL COMBAT TRIGGERS

- **Wall of Lead (GunBot™):** If a GunBot™ is the **sole defender** in an area, it triggers automatic fire before standard combat begins. Roll **6 dice (CV: 3x6)**; keep the best three dice and allocate each against up to three attackers. Leftover dice may be placed against mutant reserves. After firing, ammo is spent: the bot must be repaired before firing in automatic mode again, but continues fighting in standard combat at CV: 3x2. For tie-breakers, *Wall of Lead* is treated as the attacker.
- **Messy Triangle:** If Penny, Buck, and Percy are all present in the same room, emotional drama causes all three humans to suffer **-1 CV to defense**.

4. END OF ROUND: RECOVERY OF WOUNDED & RETREATS

Between Round 1 and Round 2 (and at the close of Round 2):

- **Recovering Wounded:** Unwounded humans or GripBots™ in the **Reserve Box** or in an **adjacent mutant-free room** may pull wounded figures into an adjacent safe room.
- **Recovery Limits:** One unwounded human or GripBot can only save **one wounded** figure. If there are more wounded than unwounded rescuers available, excess wounded cannot be saved and are removed from play.
- **Advancing Reserves:** If casualties cleared slots on the front line, players may advance figures from Reserve onto the line for Round 2.

5. Combat Resolution & Pressing Forward

After Round 2 concludes:

1. **Check Annihilation:** If one side is completely defeated (including all reserves), the other side holds the area.
2. **Count Casualties:** If both sides survive, count the wounds/kills generated. If the attackers inflicted as many or more casualties as the defenders, the attackers win and the defenders must retreat to an adjacent enemy-free room. If the defenders inflicted more casualties, the attackers retreat.
3. **No Retreat Route:** If retreating units have no valid, mutant-free space to enter, they suffer total defeat. If a retreat room has insufficient capacity, units that fit survive; the rest are eliminated.
4. **Pressing the Advantage:**
    - **Victorious Mutants:** Immediately gain a free **Smash! action** against an adjoining door or barricade.
    - **Victorious Humans:** May choose to **Press Forward** and immediately move 1 area into an adjacent room (initiating a new combat if mutants are present).

Characters, Bots, & Event Cards

Human Roster

Character	Type	Combat Value (CV)	Robot Repair	Special Rules
Prof. Applewhite	Faculty	2x2	6+	Academic theorist; poor repair skills due to delegating hands-on work.
Prof. Richardson	Faculty	3	5+	**Bot Coordinator:** All GunBots™ across the map gain +1 CV while she occupies the Robotics Lab.
Prof. Rosemarie Mincey	Faculty	3	N/A	**Ad Astra Resonance:** Spending Turns 6–9 in the Ad Astra Lab opens the escape portal at the end of Turn 9.
TA Penny Applewhite	TA	4	N/A	**Affection:** Chooses Buck (+1 CV) or Percy (+1 Repair) each turn. **Messy Triangle:** -1 Def CV to all humans if with Buck and Percy.
TA Leon "Buck" Bukaw	TA	6	5+	**Lead the Charge:** Moves 2 areas if the first is clear; can bring along humans and bots from his starting room.

Character	Type	Combat Value (CV)	Robot Repair	Special Rules
TA Percy Fitzwater	TA	3	4+ (x2)	**Master Technician:** May attempt repairs on up to two separate robots per turn, or test twice on one robot.
GripBot™	Robot	4	5+	**Rescue Bot:** Drags wounded allies during retreats. If wounded and isolated, auto-drives to Robotics Lab via safest route.
GunBot™	Robot	3x2	N/A	**Armored:** Base CV is 4 on defense. **Wall of Lead:** 3x6 pre-combat sweep when lone defender. Denies mutant outnumbering.

Mutant Menace Roster

Mutant Unit	Count	Combat Value (CV)	Special Rules
Standard Mutants (Green)	56	3	The core shambling student horde.
Radioactive (Glowing) Mutants (Red)	40	3x2	**Glow-and-Go:** Roll 1D6 in Phase 2; on a 1, detonates, dies, and grants +1 to local smash rolls.
Campus Security Mutants	5	5	Elite mutated officers armed with crowd-control weaponry. Also known as Leader mutants.
Dr. Julian Manbender	1	4	**Hive Mind:** Mutants sharing his area gain +1 CV (defense only). If killed, only mutants with a Leader can activate.

Event Card Deck

Draw 1 card during Phase 1. The effect lasts **only for the current turn** and only applies if the named character is currently in play.

Professor Applewhite Cards

- **"Maybe they can be reasoned with!"** — Mutants gain +1 CV in the first combat this turn.
- **"Save your ammo, bullets can't hurt them!"** — Humans suffer -1 CV in the first combat this turn.
- **"Robots should not have military use."** — GripBots™ may drag up to 2 wounded elements during retreats this turn. Elements are humans or bots.
- **"If my calculations are right..."** — GripBots™ gain +1 CV this turn.
- **"Grant money will flow if we survive!"** — Optionally fight 1 additional combat round in an engagement this turn.

Professor Richardson Cards

- **"Here's your education..."** — All robots gain +1 CV in their next fight this turn.
- **"Dance, Mutant, Dance!"** — All GunBots™ roll 3x3 CV in their next fight this turn.
- **"This is no longer an abstract experiment"** — All robots may move up to 2 areas this turn. They may move witout being accompanied by humans.
- **"In the movies they say, Light them up!"** — Immediately eliminate 1 Green or Red Mutant from anywhere on the board.

- **"Most of these students failed my class"** — Professor Richardson fights with CV: 3x2 this turn.
- **"GripBots have a good throwing arm"** — GripBots™ fight with CV: 4x2 this turn.

Professor Mincey Cards

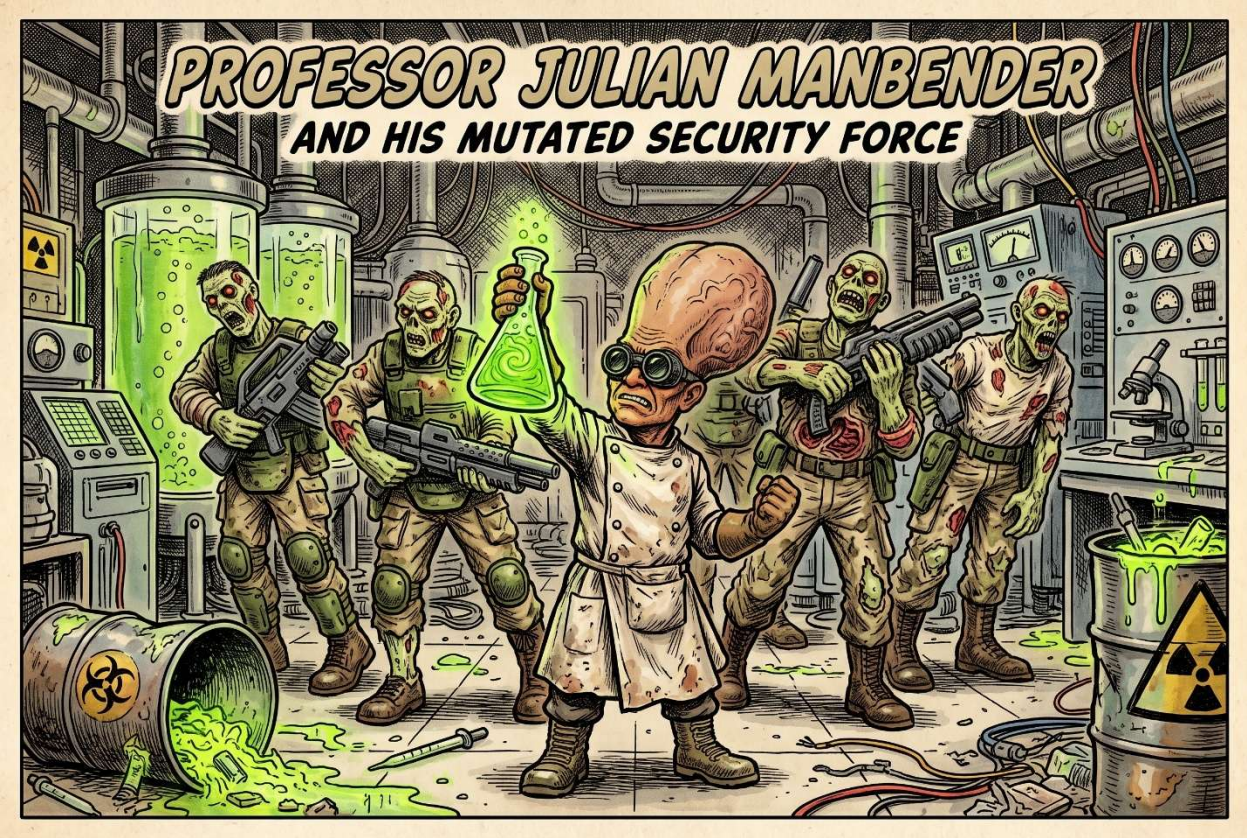

- **"Woodstock Reset Time to Zero!"** — 1970s rock blares over the campus PA system. All human players can reroll one die this turn. New result must be accepted.
- **"The Age of Aquarius is Upon us!"** — Ambient New Age synthesizer chimes echo through the corridors. Professor Mincy CV becomes 3x2.
- **"Not to be bound by the rules..."** — Instantly teleport Dr. Mincey to any area inside the building.
- **"...but to create one's own rules"** — Dr. Mincey's Combat Value increases to 5 this turn.
- **"Let's test this frequency on the mutants"** — The Mutant player must immediately remove 1D6 mutants of their choice from play.

Teaching Assistants Cards

- **"Intellectual Diversity Pledge"** — Buck fights with CV: 5x2 this turn.
- **"College Founding Fathers Creed"** — Humans gain +1 CV in any combat involving Buck this turn.
- **"About that 2nd Amendment"** — GunBots™ gain +1 CV this turn.
- **"Die you Hippy Mutant"** — Remove 1 mutant from the reserve line in Buck's next fight.
- **"Artificial Intelligence, Real Stupidity"** — Robot systems fault; all robots suffer -1 CV this turn.
- **"Zombie Attack Nerd Rage"** — Percy fights with CV: 4x2 this turn.
- **"My elongated Oblongata is very sexy"** — 1 wounded robot is automatically repaired at the end of the turn.
- **"I turn coffee into theorems"** — All wounded robots on the board are instantly repaired.
- **"Logic and Set Theory"** — All mutants suffer -1 CV to defense in the next fight.
- **"Increase the gain on the controllers now!"** — Instantly reposition 1 robot to any area on the board.

Laboratory Technology Bonus

- **Ad Astra Lab** - If the humans escape the Science Building through the Ad Astra portal at the end of the game, they enter Doctor Manbender's lab when he only has 3 Campus Security Mutants.
- **Quantum Physics Lab** - The Ad Astra device is warming up. A human or robot can exit The Tech Room and appear anywhere else in the Science Building.
- **Robotics Lab** - Robots are easier to repair, add +1 to Robot Repair for all charactes. Characters with N/A for Robotics Repair now have a 6+ Robot Repair.
- **High Performance Computer Lab** The door lock bug is now fixed. Mutants can only pass through smashed doors. Regular doors do not open when mutants are on both sides of it.

Endgame: The Ad Astra Rift & The Final Showdown

The climax of *Attack of the Mutants* hinges on control of the **Ad Astra Lab** and the activation of Dr. Rosemarie Mincey's experimental space-time rift.

---

1. Triggering the Endgame

The game timeline runs for a standard 10 turns, culminating in either a Turn 10 or Turn 11 final showdown depending on Dr. Mincey's research progress:

- **Early Activation (End of Turn 10 Showdown):** If Dr. Mincey occupies the Ad Astra Lab continuously from **Turn 6 through Turn 9**, she accelerates the field harmonics. The portal opens early, triggering the Final Confrontation during **Turn 10**.
- **Standard Activation (Turn 11 Showdown):** If Dr. Mincey was interrupted, relocated, or absent during those turns, the portal powers up on its standard baseline cycle. The humans must survive the siege through Turn 10; holding the lab triggers the Final Confrontation during **Turn 11**.

---

2. Immediate Mutant Victory Condition

- **Mechanism Destroyed:** If at any point the mutants obtain **sole control of the Ad Astra Lab** with no living humans or functional robots present, they immediately trash the equipment and smash the mechanism.
- **Result:** The time machine is destroyed, the mutation wave becomes permanent, and the **Mutants win the game immediately**. This is true **even if Julian Manbender is killed**.

---

3. The Time Rift Transition

If the Human player maintains control of the Ad Astra Lab at the trigger point (End of Turn 9 or Turn 10):

1. **Who Travels:** Every human and robot physically present inside the The Tech Room steps through the portal. Any humans or bots left in other rooms or corridors are left behind in the overrun campus.
2. **Destination:** The strike team emerges in the past inside **Dr. Julian Manbender's Private Research Lab**—catching him just as he prepares the mutagenic cocktail before the Green Energy concert.

---

4. The Final Confrontation Rules

The battle inside Manbender's lab is fought using the Tactical Combat Pad with special scenario modifications:

FORCES PRESENT

- **Human Strike Team:** All surviving humans and robots that were inside the Ad Astra Lab when the portal opened.
- **Mutant Defenders: Dr. Julian Manbender** (CV: 4, grants +1 CV on defense to mutants sharing his area) and his **5 Elite Campus Security Mutants** (CV: 5 each). If the Ad Astra Lab produced a result at the start of turn 4 then only 3 Campus Security Guard Mutants will be present.

BATTLE MODIFICATIONS

- **Surprise Round:** Because the human assault team materializes unexpectedly out of thin air, all mutant defenders suffer **-1 CV to defense during Round 1**.

- **No Round Limit:** This engagement is **not** limited to the standard two-round combat rule. Rounds continue sequentially until one side is completely eliminated or the objective is met.
- **No Wounded Drag-Off:** The chaotic, enclosed lab environment prevents casualty extraction. Human casualties cannot be dragged into safety; once downed, they remain in the Wounded box for the duration.
- **No Reserves In Retreat:** There are no adjacent safe rooms to fall back to—this is a fight to the bitter end.

---

5. Ultimate Victory & Defeat

- **Human Victory:** If **Dr. Julian Manbender is killed**, the human strike team wins! With the mad mastermind eliminated before the concert detonation, the timeline collapses, the mutagen is never released, and history is restored. You can keep playing to see if any human's survive fighting the remaining Campus Security Mutants, just to have an ending to the story, but even if they don't survive, so long as Doctor Manbender has been eliminated, the game is a Human win.
- **Mutant Victory:** If all human strike team members are eliminated and **Dr. Manbender is still alive**, the **Mutants win**. Manbender finishes his concoction unhindered, secures his thralls, and establishes his mutant utopia.

Quick Reference Sheet (QRS)

Turn Sequence

1. **Phase 1: Event Card Draw, Mutant Reinforcements**
   - Place Mutant reinforcements in exterior staging areas (max 2 per area).
   - Draw 1 Event Card (active for this turn only; requires character in play).
   - Penny Applewhite chooses favorite: **Buck** (+1 CV) or **Percy** (+1 Repair).
2. **Phase 2: Mutant Horde**
   - **Door / Barricade Smash Tests:** Roll on the Smash! Matrix (doors auto-open if mutants occupy both sides).
   - **Movement:** Mutants move 1 area inward or shift between adjacent exterior staging zones.
   - **Mark Combats:** Flag all contested rooms/corridors.
3. **Phase 3: Human Movement & Repair**
   - Standard movement: 1 area (doors open freely; barricades cannot be crossed or smashed).
   - **Buck's Blitz:** Moves 2 areas if the first is clear; may bring humans/bots starting or picked up on step 1.
   - **Repairs:** Eligible humans/GripBots roll repair checks on damaged robots.
4. **Phase 4: Tactical Combat**
   - Mutant player chooses combat order. Maximum 2 rounds per area.
   - Line max: 3 figures per side; outnumbering on the line grants **+1 CV** (negated by GunBot).
   - Attacker rolls 1D6 + CV; Defender rolls 1D6 + CV. Highest score wins; attacker wins ties (GunBot Wall of Lead counts as attacker).
   - Wounded human/bot recovery: 1 unwounded figure in reserve or adjacent safe room pulls 1 wounded figure to safety.
   - Pressing Advantage: Victorious Humans may move 1 area forward; Victorious Mutants get 1 free Smash test.
5. **Phase 5: Victory Check**
   - Check Ad Astra Lab control; advance turn track.

Smash! Matrix

Mutants Testing	*Door Breach*	*Barricade Breach*
1	6	*Not Possible*
2	5+	6
3	4+	5+
4+	2+	4+

Character Quick Stats

Character	Combat Value (CV)	Robot Repair	Special Ability
Prof. Applewhite	2x2	6+	Academic theorist; delegator.
Prof. Richardson	3	5+	GunBots across map are +1 CV while she is in Robotics Lab.
Prof. Mincey	3	—	Spending Turns 6–9 in Ad Astra lab opens portal at end of Turn 9.
Penny Applewhite	4	—	Picks Buck (+1 CV) or Percy (+1 Repair). Messy Triangle: -1 Def if with Buck & Percy.
Leon "Buck" Bukaw	6	5+	Moves 2 areas if 1st clear; carries team along.
Percy Fitzwater	3	4+ (x2)	May test repairs on two robots or twice on one.
GripBot™	4	5+	Drags wounded in retreat. Drives to Robotics Lab if wounded & isolated.
GunBot™	3x2 (4 Def)	—	**Wall of Lead:** 3x6 sweep when lone defender; denies mutant outnumbering.
Green Mutant	3	—	Standard horde unit.
Red Mutant	3x2	—	**Glow-and-Go:** Detonates on 1 (in combat), granting free smash.
Mutant Police	5	—	Tough security squad in final showdown.
Dr. Manbender	4	—	Mutants in same area get +1 CV on defense.
